A Hearth to Center of Wall Pass Through

B Distance from Wall Pass through to the Roof (If offsetting around an overhang, you will need to measure the width of the overhang)

C Horizontal Distance from Chimney to Roof Peak

D Roof Pitch (rise/run)

- If passing through an overhang please indicate the type of roof. (If metal, specify the type, i.e. corrugated, standing seam, etc)

NOTE: Pitch is Rise over Run. Example: a 6/12 pitch means the roof goes up 6"(rise) for every 12"horizontal (run).
