

Fireview Outside Air Adapter Installation

Please read all the instructions before you begin the procedure. Confirm that you have all the necessary tools and parts required. If you have any questions, technical support is available toll free at 1-800-866-4344, Monday – Saturday 9:00- 5:00, ET

Tools Needed:

- 5/32” allen wrench

Materials Needed:

- Fireview Outside Air Adapter part # W-407
- Non-combustible 4” round duct (not included)
- Suitable fastener to secure duct to adapter (not included)

The outside air adapter is designed to bring combustion air from a source outside of the building envelope to the stove. Some localities require it by code or building type, and may have specific guidelines on materials and configuration. In mobile, or manufactured home, installations it is mandatory. It may also lessen negative pressure issues associated with very tight construction. The duct should be non-combustible material such as aluminum dryer vent. A screen or grill should cover the outdoor inlet to keep

unwanted pests out. **Note:** If you are using a rear heat shield, you will need part #W-406 to accommodate the outside air adapter.

1. Make sure the stove is cool.
2. The hardware to install the outside air adapter is already on your Fireview. At the back of the flue collar there are three button head bolts. The adaptor will be installed using the two closer to the damper handle.

3. Use a 5/32" allen wrench to remove the bolts.
4. Line up the body of the adapter with the cut out on the flue collar. The adapter will cover the damper opening.

5. Secure the adapter to the flue collar with the button head bolts previously removed. The shorter bolt should be closest to the damper handle.

6. Secure the duct from the outside air source to the adapter. A hose clamp or sheet metal screws could be used depending on the type of duct.

We need your help! Woodstock Soapstone Co. takes pride in providing the highest quality products as well as the best customer service in our industry. We welcome your suggestions and input to help us achieve these goals. If you have any comments to improve our products, service, and information provided in these instructions please contact us at (800) 866-4344 or info@woodstove.com. Thank you.
